REQUEST FOR CORRECTED FILING RECEIPT

Commissioner for Patents
Attn: Office of Initial Patent Examination's
Filing Receipt Corrections
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

It has been noted that the Filing Receipt dated January 24, 2002, omits domestic priority information. Please note, the correct priority information is as follows:

This application is a continuation of nonprovisional application no. 09/139,194 (now patent no. 6,411,965), filed on August 25, 1998, which claims priority to nonprovisional application no. 07/975,905 (now patent no. 5,799,320) filed November 12, 1992, which claims priority to nonprovisional application no. 07/397,996 filed on August 23, 1989 (now abandoned).

A copy of the Filing Receipt with the corrections noted thereon is attached. Also attached is a copy of the first page of the specification filed on December 14, 2001, to show priority information claimed by applicant, as well as a copy of the second page of the declaration filed with this application, also showing priority information.

Applicant respectfully requests the issuance of a corrected filing receipt showing the priority information.

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

BACKGROUND OF INVENTION

1. Field of the Invention

15 The present invention relates to a system and method which allows any one of a plurality of users to interactively edit, in real time, a given graphics and/or text/data file. More particularly, the present invention relates to a system and method which permit any or all of a plurality of users at remotely located personal computers to edit a file resident in one of the computers.

2. Description of the Related Art

For hundreds of years, authors have had to rely on highly skilled craftsmen to convert their hand-written or type-written manuscripts and artistic renderings into typeset galleys and artwork suitable for reproduction by printing. Yet, most recently,
25 centuries of skill and tradition have been overturned by a new development in the computer industry called desktop publishing.

Desktop publishing has become possible due to the ever increasing power of personal computers, new and affordable output devices such as laser printers, and more powerful software, including page description languages, such as Postscript.
30 Desktop publishing can now allow an individual or business to quickly and inexpensively produce attractive and professional newsletters, brochures, reports,
